

ABOUT ME

I'm a front-end software developer specializing in HTML, CSS, React frameworks, Next.js, Tailwind CSS, Node.js, Express and many more . I build responsive, user-centric web applications with a focus on performance and seamless design. Passionate about crafting intuitive digital experiences, I stay current with the latest web technologies and trends. My goal is to continuously sharpen my skills while collaborating with innovative teams to create meaningful and impactful solutions.

PROFESSIONAL
EXPERIENCE

Wed Development Student | Uncommon.org | 2024 – Present

- Developed responsive web applications that boosted user engagement.
- Worked closely with team members to complete projects efficiently and on time.
- Took part in performance reviews to help the team improve and keep quality standards high.

Youth Coding Volunteer | Uncommon.org | 2024 – Present

- Teach Scratch programming to school kids every weekday.
- Create lesson plans and guide students to build their coding skills.
- Run workshops to get students excited about tech and creative thinking.

Tech Connect | Full-Stack Web Application | Uncommon.org | 2025 – Present

- Built a responsive full-stack web platform enabling user authentication and data management using Firebase Authentication and Cloud Firestore.
- Utilized Next.js for SSR/CSR efficiency and Styled Components for dynamic, scalable component-based styling.
- Deployed via Vercel with CI/CD integration for seamless updates and production-ready delivery.
